Emre Can Kadirhan

kadirhanemreemre@gmail.com | (512)-800-2782 | LinkedIn: emre-kadirhan | GitHub: ruff1e

SKILLS

Programming Languages: Python, Java, JavaScript, TypeScript, C, C++, HTML, CSS, SQL
Frame Works: Django, Spring Boot, Next.js, React.js, Flask, Tailwind CSS
Tools and Technical Skills: Git, GitHub, Docker, CI/CD, AWS, Linux/Unix, Postman, Unit Testing, REST APIs, Data Bases, OOP

PROJECTS

Social Network

- Built a full-stack social media web app with user authentication, following system, and post creation.
- Designed a relational model to allow users to follow/unfollow others.
- Implemented a personalized "Following Feed" that displays posts only from followed users.
- Implemented pagination for posts (10 per page) with Next/Previous navigation.
- Added AJAX-based post creation and dynamic updates without page reloads.

E-Commerce Platform

- Developed an online auction/e-commerce site with user authentication, bidding, commenting, and watchlists.
- Implemented category-based browsing to allow users to filter listings by type and real-time bid validation.
- Enabled users to comment on listings, fostering interaction between buyers and sellers.
- Designed responsive UI for mobile and desktop.

Student Management System

- Developed a robust Student Management System using Java, Spring Boot and MySQL. The system facilitates efficient management of student data, including functionalities for adding, updating, deleting, and viewing student records.
- Implemented using Spring Boot, ensuring scalable and maintainable architecture.
- Utilized MySQL for data storage, leveraging JDBC for database connectivity.
- Comprehensive CRUD operations for managing student records, including search and sorting capabilities.

EXPERIENCE

TQueue Software StartUp **Mugla, Turkiye**
Software Engineer Intern *June 2024 – August 2024*

- Participated in code reviews and provided constructive feedback to team members
- Optimized code for performance and scalability
- Developed new features to do tasks resulting in this efficiency metric
- Refactored customer management feature resulting in 20% less latency
- Refactored customer management feature to provide a more scalable solution resulting in developmental efficiencies that resulted in improved features by 30%

EDUCATION

GPA: 3.86
Arizona State University – Tempe, AZ B.S. in Computer Science | Expected Graduation: May 2027
The University of Texas at Dallas – Richardson, TX B.S in Computer Science | 2022 – 2024
